COLLABORATIVE RISK MANAGEMENT

merik.top

Eliminating Groupthink through Secret Voting on Risk Probability & Impact

100% Anonymous Voting

Free & Instant Access

THE CHALLENGE

Why Traditional Risk Workshops Fail

Anchoring Bias

First spoken rating skews all subsequent scores.

Loudest Voice Dominance

Extroverted participants overpower subtle domain insights.

Authority Pressure

Junior members hesitate to contradict executive opinions.

THE SOLUTION

Unbiased Evaluation with merik.top

Group Hazard Identification

Collaboratively list all potential risk scenarios together.

Secret Ballot Voting

Vote probability and impact privately without peer influence.

Instant Objective Reveal

Expose variance and deliberate on true discrepancies.

SIMPLE WORKFLOW

4 Steps to Unbiased Risk Ratings

STEP 01

Create Session

Instant URL generation with zero account setup.

STEP 02

Input Risks

Enter identified team risks onto the room canvas.

STEP 03

Cast Ballots

Members score likelihood and severity privately.

STEP 04

Reveal & Align

Display consensus heatmaps and address outliers.

CORE VISUALIZATION

Interactive Probability & Impact Matrix

Dual-Axis Evaluation

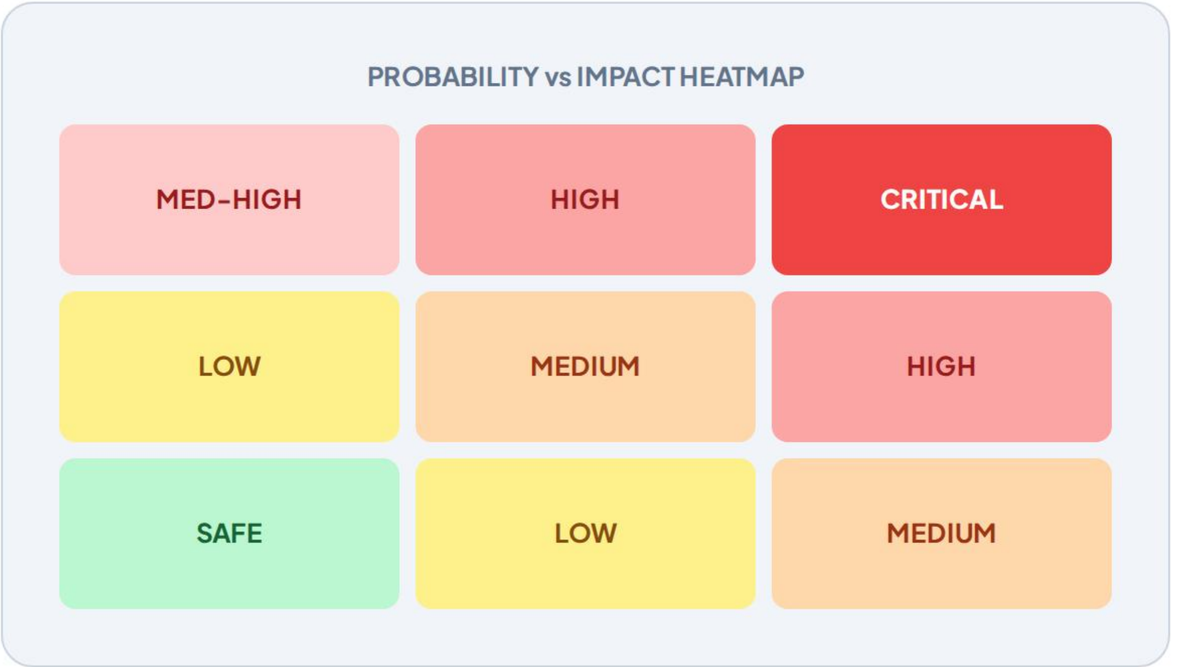

Simultaneous scoring of Probability (Likelihood) and Impact (Severity).

Outlier Detection

High standard deviation highlights crucial differing perspectives.

Automated Matrix Plotting

Aggregate scores map directly into standard corporate risk grids.

PLATFORM BENEFITS

Designed for Frictionless Adoption

100%

Free Service

Zero paywalls or tier restrictions.

0

Sign-ups Needed

Participants join instantly via link.

100%

Secret Voting

Prevents peer pressure entirely.

3×

Faster Alignment

Discussions focus only on outliers.

APPLICATIONS

Ideal Contexts for merik.top

Agile & Tech Projects

Sprint risk reviews and software release hazard assessments.

Operational Safety (HSE)

Workplace safety audits and industrial hazard evaluations.

Executive Strategy

Market expansion uncertainty and investment risk mapping.

BEST PRACTICES

Facilitator Guidelines for Max Impact

Calibrate Rating Scales Explicitly

Define clear criteria for low vs high impact before voting starts.

Enforce Strict Silence During Voting

Prohibit verbal cues or comments while ballots are being cast.

Focus Session Discussions on Outliers

Spend debate time exclusively on items with high voting variance.

METHODOLOGY COMPARISON

merik.top vs Traditional Methods

Assessment Method	Cognitive Bias Risk	Voting Secrecy	Setup Friction
Open Discussion	Severe (Loudest Voice)	None	Instant
Shared Spreadsheets	High (Anchoring)	Low / Moderate	Moderate
merik.top	**Zero Bias**	**100% Anonymous**	**Zero Sign-up**

TRY IT NOW

Unbias Your Next Risk Assessment

Free, instant, and secret probability voting for high-performing teams.
